

Stainless Steel Balusters, Handrails & Railing Accessories

What We Are

We present ourselves as a firm that has been manufacturing Stainless steel accessories for over a decade and that specializes in Balustrades & Hand rail systems.

Crescent has always aspired to create designs that are aesthetically appealing at the same time functionally sound, which is obvious in its modular systems. Our designs are a unique system of standard modular components which ensures no on site fabrication and welding. Since the components are engineered to accommodate various on site conditions, the mounting of the products at site becomes very simple. An experienced and trained installation team, equipped with state-of-the-art tools further substantiates our quest to provide complete engineered railing solutions. Our plant possesses modern machinery which are duly modified to suit the needs.

We at **Crescent** use AISI 304 Stainless Steel for its unmatched strength and flawless finish, this can be seen in our product range. **Chemically passivated components** and tubes ensures the formation of natural oxide surface film which results in very high corrosion resistance.

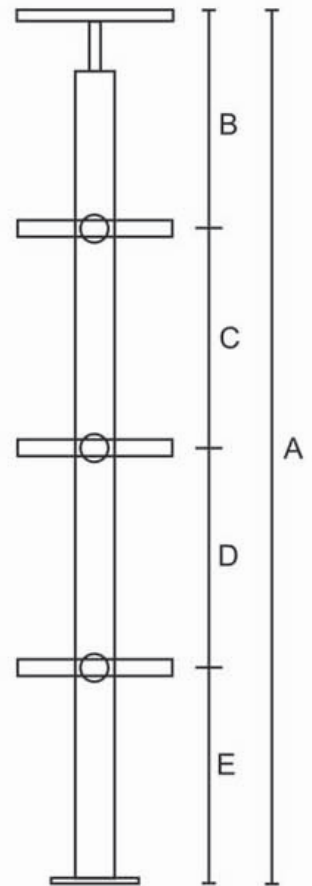

Our products has a wide span of application, they very used at residential bungalows, domestic / commercial / institutional buildings, amusement parks, multiplex, airports, shopping malls, hotel/restaurants. Their uses are increasing everyday through the vision of our clients and the imagination of their architects and designers.

Our contemporary designs caters to the needs of demands of modern times and a team of highly qualified industrial designers and engineers are constantly providing fresh ideas and design innovations.

We put in a lot of effort to achieve the highest quality, which begins with a human thought and ends with a tangible product.

Balusters & Handrails
